

Ladder Safety Training Attestation

In compliance with OSHA 29 CFR 1910 Subpart D – Walking-Working Surface regulations, Ladder Safety Training shall cover the following:

- General construction of ladders
- Different types of ladders
- How to select a ladder for a specific area
- How to properly set up a ladder
- How to identify equipment damage and proper ladder functionality
- Proper ladder storage and maintenance
- Safe ladder set up locations at a workplace

Upon receiving Ladder Safety Training by the Industrial Hygiene Officer (IHO), or qualified designee, please complete and return this form to the IHO. Your supervisor or the IHO (or qualified designee) will provide additional information and training as appropriate.

By signing below, you acknowledge that you are aware of the potential hazards associated with ladders, best practices for set up, storage, and maintenance of ladders, and the policies and procedures applicable to the OSHA 29 CFR 1910 Subpart D – Walking-Working Surfaces standard.
